SKILLS

SQL (Snowflake)	Data Modeling, Data Quality, Metrics &	Technical Communication
dbt	Analytics Enablement	Process Improvement
AI Enablement	Stakeholder Partnership	Team Mentorship

EXPERIENCE

Data Engineer II **Sep 2021 - Present**
Pebl (Formerly Velocity Global), Remote
Data Stack: Snowflake · dbt · Airflow · Looker · Python

Pebl is a global workforce solutions company enabling organizations to hire, manage, and pay talent worldwide. Within Pebl, the analytics function supports data-driven decision-making by transforming complex operational and business data into trusted, analytics-ready datasets. Responsible for translating business requirements into scalable data models using Snowflake SQL and dbt, partnering with stakeholders to define metrics, and building reliable analytics pipelines that support reporting, insights, and self-service analytics.

- Designed and implemented scalable analytics data models in Snowflake and dbt, translating complex business requirements into clean, performant SQL transformations that reduced metric ambiguity and established a trusted, maintainable analytics foundation
- Led AI enablement initiatives by implementing Snowflake Cortex Agents and Analyst, operationalizing LLM-powered data exploration and accelerating stakeholder access to insights.
- Partnered closely with cross-functional stakeholders to clarify requirements and edge cases, ensuring strong alignment between business intent and data outputs
- Improved data quality and reliability through validation logic, testing, and iterative refinement of pipelines, leveraging Python where SQL alone was insufficient
- Enabled reliable, self-service analytics by developing Looker explores and views and supporting Airflow-orchestrated pipelines, reducing ad hoc requests and increasing stakeholder independence

External Relations Manager/Admissions Representative **Jul 2018 - Apr 2020**
Up with People, Road Position

Up with People is an international nonprofit focused on education, cultural exchange, and leadership development, operating programs across multiple countries worldwide. Progressed from Admissions Representative to External Relations Manager based on consistent high performance and demonstrated leadership.

- Progressed from Admissions Representative to External Relations Manager, leading and mentoring a globally distributed team and implementing a Coaching and Leadership program that contributed to an all-time recruitment record for a 55-year-old organization
- Led international recruitment and outreach across 11 countries, facilitating 300+ workshops and partnering with diverse stakeholders in fast-paced, cross-cultural environments

Software Engineering Intern **May 2016 - Aug 2017**
Parkifi (Acquired by Dish), Denver CO

Parkifi is a smart parking technology company focused on providing real-time parking data to cities and businesses.

- Contributed to production software development, applying computer science fundamentals to real-world systems that directly supported business operations
- Collaborated with engineers on feature development and codebase improvements, gaining hands-on experience with the full software development lifecycle
